Table1: List of Minor Courses

- Students pursuing a major in a particular subject must choose their minor from a different discipline. For example, if a student has opted for Physics as their major, they cannot select Physics as a minor subject. Instead, they may choose a related or complementary subject such as Mathematics for their minor
- The total credit for a major subject is 6 and for a minor subject is 4. If a subject includes both theory and practical components, the credits for a major subject will be distributed as 4 credits for theory and 2 credits for practical, while for a minor subject, the distribution will be 3 credits for theory and 1 credit for practical. In all cases, the total credits will remain 6 for a major subject and 4 for a minor subject.
