4. **Pre-Requisite If Any : NIL**

5. **Course Learning Outcome (CLO)**

Value education enables us to understand our needs and visualize our goals correctly and also indicate the direction for their fulfillment. It also helps remove our confusions and contradictions and at the same time human values form the basis of decision making. This course will make students familiar with our ancient human values which were praised by many travelers of that time and remained part and parcel of Indian culture for a very long time. The study of ancient Indian Human Values will reestablish the glory of ancient culture of India.

Our Indian Culture has excellent characteristics and features hence it was superior than other culture. The main characteristics of our culture is assimilation and predominance of human values, but modern time we are losing the values due to disruption of family, industrialization, urbanization and modernization. One more thing is also important that inclusion of modern values in the society our identity is going to be shaded in the global prospective. To maintain the glory of Indian culture it is our planning to introduce this paper for the awareness of students and also highlights the thoughts of our great thinkers.

Unit IV: Architecture and Sculptures as a source of Ancient Indian History			
Unit V: Archaeological Remains as a source of Ancient Indian History			
4.	Pre-Requisite If Any : NIL		
5.	Course Learning Outcome (CLO)		
Sources are an important aspect of history. Without sources history cannot be reconstructed. A student of history should be aware of the sources in order to make his future research easy. History is a study of the past events and facts. The sources present a chronological order of the past events. To study the past we have to take the help of sources to come closer to the truth. The sources help the students to know about our proud ancient culture. After completing the syllabus students will be able to distinguish between primary and secondary sources and identify and evaluate evidence. The study of this paper will enhance in the students the capability to explain historical events on the basis of evidence like ancient literature, epigraphs, coins and so on. They will also learn how cultures changed over the course of the centuries. Students will produce their own historical analysis of documents and develop the ability to think critically and historically when discussing the past.
