CLEAN AND GREEN CAMPUS POLICY
APPROVED IN BOM Dt. 19/01/2018

SARVEPALLI RADHAKRISHNAN UNIVERSITY BHOPAL

CLEAN AND GREEN CAMPUS POLICY

Introduction

SRK University envisions a Clean and Green Campus where environmental friendly practices and education combine to promote sustainable and eco-friendly practices in the campus and beyond the campus. The green campus concept offers the institution an opportunity to take the lead in redefining its environmental culture through instilling environmental ethics among students and staff. The Institute also promotes Clean and Green campus through adopting, practicing and promoting environmental friendly practices among students and staff to generate Eco-consciousness among them and in the world around them.

The increasing human foot print on earth poses great environmental challenges that continue to grow over time. An unprecedented effort is required to alleviate the adverse effects that human activities have on the ecosystem, effects that in turn alter how we interact with the earth and with each other. Inclusion of all approaches to problem solving will be necessary to effect a meaningful change.

Vision

Is to create awareness among young students and public about various environment related problems and conservation of Nature and natural resources in the surrounding area and educating on how to live Eco-friendly.

Mission

- To bring awareness among the students about the hazards spoiling the environment.
- To help the students understand each individual's responsibility to take an initiative to save the environment.
- To help students take small steps in saving the environment.

Objective

- To encourage students to keep environment clean.
- To educate students to create awareness amongst public.
- To make students understand the importance of environment and its problem areas.

Function

- To sensitize the students to minimize the use of polluting product.
- To motivate students to adopt environment friendly practices which include paper bags, save electricity, etc.

- To take necessary steps to protect the environment.

Outcomes

- Awareness is created about the hazards that are spoiling the environment.
- Students and teachers realize their individual responsibilities to save the environment.

ENVIRONMENTAL POLICY OF THE UNIVERSITY

SRK University and its constituent units are a quality conscious institutes. It protects its own environment with its green campus initiatives and maintains a pollution free green and clean campus. Environment development is its basic work with the educational policies implemented on the campus.

The Institution is committed to managing its campus in accordance with responsibilities towards promoting sustainable environment. These responsibilities can be demonstrated within the following areas:

- **Green Environment and Clean Campus**
- **Solid Waste Management**
- **E -Waste Management**
- **Liquid Waste Management**
- **Soil Management**
- **Maintenance of Water Bodies**
- **Water Conservation and Management**
- **Paperless operating procedure**
- **Landscaping with Trees and Plants)**
- **Roof Gardening Initiative**
- **Energy Use and Conservation**
- **Noise Pollution Management**
- **Air Pollution Management**
- **Restricted Use of Automobiles**
- **Ban on Single-use Plastics on the Campus**
- **Display Boards on College Campus**
- **Green Audit**

Green Environment and Clean Campus

The students are given strict instructions to maintain the campus clean and it is reflected in their handbooks. Several Quotes related to the importance of clean and green environment are displayed on the campus.

A gardener and full time adequate support staff are appointed for the maintenance of litter free clean and Green Campus.

Solid Waste Management

The college pays dedicated focus to see that minimal waste is generated in the campus. Solid waste is segregated as bio degradable and non-degradable and handed over to (Bhopal Municipal Corporation) as a part of Swach Bharat initiative and Clean and Green Bhopal. All Departments and classrooms are provided with dustbins for dry wastage disposal. Segregation of waste into dry and wet waste from the separately allotted dustbins is done in strategic locations, thus maintaining the Campus clean and Eco- friendly.

Use of sanitary disposal machine is one of the best practices adopted by the college towards eco-friendly disposal mechanisms.

E -Waste Management

With the proliferation of electronics also comes the challenge of their proper disposal. The University is grappling with ways to efficiently and cost-effectively handle the issue of electronic waste, or e-waste, on campus. It's normal for people to discard of products due to normal wear and tear, but technological advancements have accelerated e-waste growth as students, faculty and administrators frequently upgrade to better gadgets. This surge has forced college administrators to carefully examine and address the environmentally responsible disposal of these products on a campus-wide scale.

The University adopts most scientific and eco-friendly e-waste disposal mechanisms such as

AMC is maintained to periodically review the effective functioning of CPU's and Monitors and expert recommendations are followed to dispose the same in the market. All Electronic waste CPU's, Hard disks, Laboratory Equipment scrap is sent periodically to the market for sale. The institution has a contract for approved E-Waste Management and Disposal facility in order to dispose E-waste in scientific manner. Obsolete workable computers, printers and other equipment discarded by departments are sold as scrap. The cartridges of printers are refilled outside the University campus. UPS Batteries are recharged and repaired by the suppliers.

B. Suitable budget is allocated to upgrade the systems.

Liquid Waste Management

Next to air, water is the most important element for the preservation of life. Water is a finite commodity which, if not managed properly, will result in shortages in the near future. Water conservation can go a long way to help alleviate these impending shortages.

Students are made aware that conserving water is equivalent to conserving their future. Drinking water from the tap, and refilling bottle as often as the students need is one of the best practice followed at SRK University. Disposable bottles are not allowed.

In house - plumbers attend promptly to fix leakages and wastage of water.

Soil Management

The University has started vermi composting culture. In this process the University is able to produce 100kgs vermin compost approximately per month and after completion of this process of vermin composting, the same is used as manure. The main benefits of this process is to reduce the waste in the environment and also it works as a cost saving measure. The main objective of this culture is to understand the benefits of composting and organic farming.

Solid waste from bird droppings, food leftovers from the canteen is treated and converted into vermin compost in the vermin compost pit.

Maintenance of Water Bodies

The Institution aims to provide the best services to the students in all the possible ways, in education facilities, in infrastructure and in basic necessities like water. The institution functions with the help of ground water. The institution has a good storage of ground water, drinking water and water for cleaning purpose. 50000 liters capacity underground tank is exclusively set for Fire-Safety and it gets filled with rain water. And for drinking purpose, the Institution has R.O purifier, which purifies and separates drinking water and waste water. That waste water is used for cleaning purpose. Every floor is equipped with Sintex and water coolers.

It is made mandatory to clean and disinfect water holding tanks in regular intervals, if required. This is to remove algae (plant growth which produces bad tastes and odors), silt, and bacteria which may be harmful. Cleaning methods which are followed at University

1. Empty the tank.
2. Scrub or pressure wash the interior walls to remove dirt and grime.

3. Rinse out the tank.
4. Mix a solution of household bleach and water (1 tablespoon or 15 ml of bleach for every gallon of water).
5. Scrub or pressure wash the interior walls of the tank with this solution, and leave it sit for 2 hours.
6. After 2 hours, thoroughly rinse the tank with clean water.
7. Refill with potable water.

Water filters are replaced periodically to provide the students and staff with pure drinking water

Paperless Operating Procedure

SRK University is striving towards a paperless office, a work environment in which the use of paper is eliminated or greatly reduced. This is done by converting documents and other papers into digital form, a process known as digitization. University believe that "going paperless" can save money, boost productivity, save space, make documentation and information sharing easier, keep personal information more secure, and help the environment.

Several initiatives are taken to minimize the usage of paper. Wherever possible automation and digitization are introduced which helped in minimization of usage of paper. Digital storage of documents is one such measure. Institutional data to a great extent is stored digitally. Technology is used to a greater extent for communication among the staff and the students rather than paper communication. What's app - class wise groups, Department wise groups, Committee wise groups facilitate E-communication and use of public address systems reduces usage of paper in notices and circulars.

Landscaping with Trees and Plants

University organizes Tree Plantation program every year at the University Campus. Faculty and students take part in the green initiative of the government. Students and staff enthusiastically initiate and participate in the tree plantations drive on the campus and also outside the campus. The plantation program includes plantation of various types of ornamental and medicinal variety, wild plant species in large numbers. This program promotes eco-friendly environment, by stepping up the oxygen levels on the campus.

Energy Use and Conservation

A.) Use of LED Bulbs in University : Principal's Office, Office of IQAC, Administrative Office, Library, Guest Rooms, Indoor Stadium, Ladies Common Room, Virtual Classrooms, Language Lab, Computer Labs, Science Lab, Departmental Offices, and all classrooms have LED bulbs to save and conserve energy.

Noise Pollution Management

A) Silence zones in the University: Various display boards have been placed in the library and other places for awareness to maintain silence in the college.

B) Noise control in the University: The security guard and the Physical Director of the college ensure smooth entry and exit of students without any noise.

C) No pressure horns for vehicle: Our staff members and students are asked to refrain from pressure horns

Air Pollution Management

A) Periodic Awareness Programme for Staff, Students and Society: The University conducts awareness programmes for staff, students and society for protecting and maintaining environment. Environment awareness programmes, rallies, etc. are conducted on various issues related to environment and health.

B) "No Smoking, No Tobacco" in campus area: Tobacco and tobacco products are strictly prohibited in the University premises and consuming Tobacco and tobacco products is a punishable offence. The instructions regarding this are given to the students and the staff members. The boards are displayed at various places in the college.

Ban on Single-use Plastics on the Campus

University has been constantly adopting practices and revising its policies towards a cleaner and plastic-free campus.

The institution conducts sensitization programs on the harmful impact of single-use plastics and mandates all the students to avoid bringing non-bio-degradable plastic items to the institution, which include plastic bags, cups, plates, small drinking water bottles, straws and sachets. The institution facilitates environment friendly substitutes like stainless steel, washable and reusable tumblers at all water units and mandates the canteen to serve only in paper plates and paper cups to systematically ban the use of plastics on the campus.

Display Boards on University Campus

Various boards that promote environmental awareness and ethics -- noise control, tobacco free campus, conservation of energy, recycling of resources, tree plantation etc are displayed for all the stakeholders.

Green Audit

SRK University committed to create “an environment of educational excellence” adopts the ‘Green Campus’ system for environmental conservation and sustainability. The University conducts Green Audit every year to identify, quantify, describe and priorities a framework of Environment Sustainability in compliance with the applicable regulations, policies and standards. A gardener and full time staff are appointed for the maintenance of clean and Green Campus
